

Wall bar with 14 oval clear-varnished beech rungs. One of the two upper rungs is placed inwards while the other outwards to carry out suspension exercises.

Powder-coated steel uprights with bars to fix the product to the wall. The wall bar is useful in carrying out joint and muscular exercises, in particular preventive and therapeutic exercises against backache. Other uses of the wall bar are rehabilitation and workout exercises, joint stretching, and exercises to correct bad posture and joint movement exercises in children.
